

# CLIMATE DECLARATION FOR AGGREGATES FROM NYRAND GRAVEL PIT-SVEBØLLE

Functional unit: 1000 kg of aggregates

The climate declaration shows the emissions of greenhouse gases, expressed as CO<sub>2</sub>-equivalents. It is based on verified results from a lifecycle assessment (LCA) performed as basis for an EPD<sup>®</sup>, in accordance with ISO 14025 and EN 15804.

## Information about the product

The products declared are aggregates manufactured by NCC Industry, Division Stone Materials. The declared site is Nyrand in Svebølle, a large-sized gravel pit owned by NCC Industry in Denmark. The declared products produced at the site during 2020 (listed in Table 1) are intended to be used mainly as, e.g. asphalt, concrete and as unbound materials in civil engineering.

## Information about the company

NCC is one of the leading construction and property development companies in the Nordic region, with sales of 54 billion SEK and approximately 14 500 employees in 2020. With the Nordic region as its home market, NCC is active throughout the value chain – developing commercial properties and constructing housing, offices, industrial facilities and public buildings, roads, civil engineering structures and other types of infrastructure. NCC also offers input materials used in construction and accounts for paving and road services.

## Climate declaration A1-A3

The table below lists the emissions of greenhouse gases A1-A3 for the product in kg CO<sub>2</sub> eq. per 1000 kg aggregate.

Impact category	Product group 1	Product group 2
<b>GWP - Total</b>	2.4	2.6
<b>GWP – Fossil</b>	2.4	2.6
<b>GWP – Biogenic*</b>	0	0
<b>GWP – Luluc</b>	2.6E-04	3.2E-04
<b>GWP – GHG**</b>	2.4	2.6
Product group 3	Product group 4	
2.6	2.8	
2.6	2.8	
0	0	
2.4E-04	2.6E-04	
2.6	2.8	

\*This indicator is set to zero, due to inconsistencies in the dataset used delivered by Sphera. Though, net result over the life cycle is zero since carbon uptake and emission is zero during a life-cycle. \*\* The default value to use in the Swedish Transport Administration's tool Klimatkalkyl is 4.0 kg per tonne aggregates (Trafikverket, 2021)

## Other environmental impacts
