

# Environmental Product Declaration

for 26623 REC Basic denim fabric in accordance with ISO 14025

### **Programme**

The International EPD $^{\circ}$  System, www.environdec.com EPD Turkey, www.epdturkey.org

## Programme Operator

EPD International AB & EPD Turkey

Date Of Publication (issue): 2020-10-26

Date of Validity: 2025-10-24

An EPD should provide current information and may be updated if conditions change. The stated validity is therefore subject to the continued registration and publication at www.environdec.com

EPD Registration Number: S-P-01984

This EPD covers the following product group: ISKO 26623 REC Basic in accordance with ISO 14025.

UN CPC CODE: 26620 Woven fabrics of cotton, containing 85% or more by weight of cotton, weighing more than 200 g/m<sup>2</sup>.

Owner of the Declaration: ISKO™

Manufacturer: ISKO Division, Sanko Tekstil Isletmeleri San. ve Tic. A.S. Organize Sanayi Bölgesi 3.Cadde 16400 Inegol / Bursa / Turkey

Programme Operator	EPD International AB, Box 210 60, SE-100 31 Stockholm, Sweden E-mail: info@environdec.com Regional Office: EPD Turkey, Nef 09 B Blok 7/15 Kağıthane/ Istanbul, Turkey www.epdturkey.org
Product Category Rules (PCR)	Woven Knitted and Crocheted Fabrics of Naturals Fibres (Except Silk), for Apparel Sector 2018:08, version 1.02 UN CPC 265 (except 2651), UN CPC 266, UN CPC 281
PCR Review Was Conducted By	The Technical Committee of the International EPD® System. A full list of members available on www.environdec.com. Chair of the PCR review: Barbara Nebel Contact via: info@environdec.com
	Independent verification of the declaration and data, according to ISO 14025:2006:
Verification	EPD process certification
Third Party Verifier	Dr-Ing. Nikolay Minkov LCA and Sustainability Specialist, Independent EPD Verifier Schwartzkopffstrasse 3, 10115, Berlin, Germany E-mail: nikolay.minkov@greenzero.me Accredited or approved by: The International EPD® System
	Procedure for follow-up of data during EPD validity involves third party verifier:
Data Follow Up	☐ Yes ✓ No
LCA Study & EPD Design Conducted By	Semtrio Sustainability Consulting BUDOTEK Teknopark, No 4/21, Umraniye / Istanbul Turkey www.semtrio.com

ISKO™ has the sole ownership, liability and responsibility of this EPD. For further information about this EPD or its content, please contact *Mrs. Ebru Ozkucuk Guler* at sustainability@isko.com.tr.

EPDs within the same product category but from different programmes may not be comparable.

## **OUR DENIM**

Denim fabrics look at people, and we explore our denim world through their lifestyles.

ISKO<sup>™</sup>, the leading ingredient brand on a global level, is the first denim producer in the world to be recognized with the Nordic Swan and EU Ecolabel certifications. It has a production capacity of 300 million meters of fabric per year, with 2000 state-of-the-art automatic looms. It creates the soul of jeans, the essence of the most popular fashion style that has become universal.

ISKO<sup>TM</sup>'s vision is as international as the love for denim. It can adapt to different contexts and markets, becoming a point of reference for the most famous designers and inspiring new

## **INNOVATION since 1904**

With a global presence and offices in 35 countries, ISKO™ is part of SANKO TEKSTIL, the textile division of SANKO Group.

ISKO™'s route to textiles began in 1904 and in 1989 we opened our 300,000 m2 manufacturing plant, making ISKO™ the world's largest denim manufacturer under one roof.

# **ISKO Philosophy**

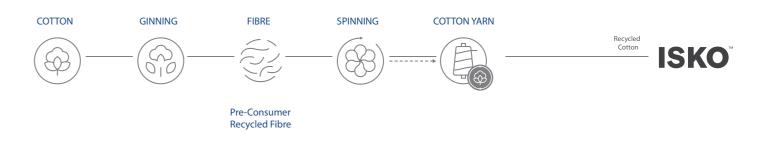

**PERFORMACE** 

 $\mathsf{ISKO}^{\mathsf{TM}}$  is the denim specialist, all fabrics are characterized by an advanced technology and the deeply-rooted care for quality, during all the integrated production from yarn to finishing processes.

## **OUR COMMITMENT**

Sustainability is inherent to ISKO's DNA: every day we value responsibility and a 360-degree innovation. This is something we take seriously, and we are dedicated to doing this with beauty, heart, and creativity.

ISKO<sup>TM</sup>'s mission is to always keep in touch with the latest trends and also to anticipate times. ISKO $^{\text{TM}}$ 's research center is certified by the Turkish government and it consists of more than 25 textile engineers, specialists in creating new denim products.

## **ORGANIC CONTENT STANDARD (OCS -TR)**

03

This scheme verifies that ISKO<sup>TM</sup>'s products have metorganic standards throughout its life cycle – from raw material to finished product. OCS blended is used for our products that contain 5% minimum of organic material blended with conventional or synthetic raw materials

The RCS is a chain of custody standard that verifies recycled input material that tracks recycled raw materials through the supply chain from input to the final product. The standard was developed through work by the Materials Traceability Working Group, part of Outdoor Industry Association's (OIA) Sustainability Working Group. The RCS uses the chain of custody requirements of the Content Claim Standard (CCS).

SUSTAINABLE

Sustainability at ISKO™ we rethink our sourcing strategies and refuse to source more material than we need. Our waste management innovations reduce the environmental performance impact from yarn to fabric production, by using reused and recycled materials.

## 26623 REC Basic of jeans. The company offers a product range going from stretched fabrics to authentic denim constructions, but all with advanced technical features. In our top-notch denim mill, ISKO™ develops unique textile concepts applying scientific expertise and research to deliver high-performance denim fabrics. ISKO™'s premium technology guarantees day long comfort and freedom of movement, extreme softness to the feel and touch, all thanks to a range of ISKO<sup>™</sup> patents ensuring the highest quality standards and a close attention to responsible

## **Technical Specifications\***

Physical Parameter Evaluated	Test Method	Feature UOM Actu		Actual Value
Pilling Resistance	ISO 12945-2: 2000	-	Rating	N/A
CF to Water	BS EN ISO 105 : E01: 2013	Cotton	Rating	N/A
Tancila Strangth	ASTM D5034: 2017	Wrap	kg	105.3
Tensile Strength	A31W D3034. 2017	Weft	kg	49.2

	ASTM D1424: 2019	Weft	g	4510
OFte Overlier	AATCC 8: 2016	Dry	Rating	2.5
CF to Crocking	AATCC 8. 2010	Wet	Rating	1
рН	ISO 3071:2020	-	-	7.1
Stiffness	ASTM D4032: 2016	-	kg	3
Elongation	ASTM D3107: 2019	-	%	12

<sup>\*</sup>The functional unit does not take into account all technical, functional and aesthetic properties of the product. For comparability of products based on the same PCR, these aspects shall also be considered. Thermal insulation properties are not relevant to disclose and weigth per unit is a confidential business information. Similar test methods are used for the product of this LCA study that complies with the test methods in Table 1 in the PCR.

# **Additional Environmental Information**

## **Certifications & Partnerships**

ISO 9001:2015 **ISO** 14001:2015

ISO 27001:2013 **ISO** 50001

OHSAS 18001:2014

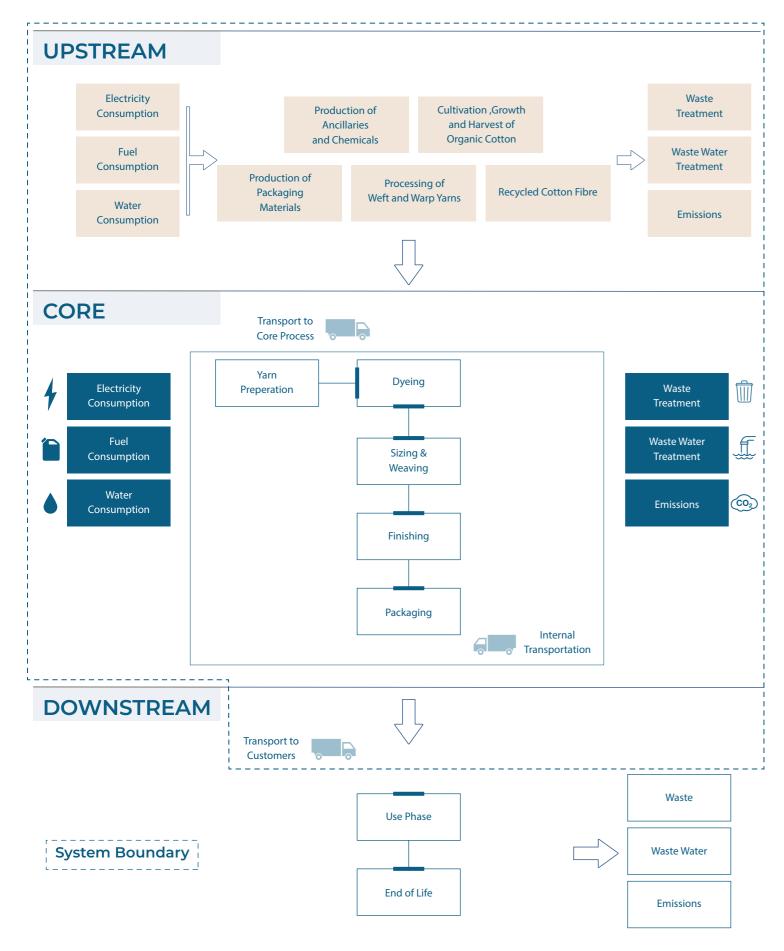

Chemicals used in ISKO™ manufacturing comply with the Regulation (EC) No 1907/2006 of the European parliament and of the council of 18 December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH).

## **Content Declaration**

Materials	Amount
Cotton Fibre	> 85%
Man-Made Fibres	< 15%
Chemicals	Amount
Sodium Hydroxide	10-25 %
Reducing agent	< 5%
Sizing Chemical	< 5%
Other Organic Chemicals	25-40%
Other Inorganic Chemicals	< 1%

Packaging: PE packaging film is used to cover the end products. Classfied as Distribution Packaging: designed for the purposes of transport, handling and/or distribution.

The International EPD® System has adopted an LCA calculations procedure, which is separated into three different life cycle stages:

- **Upstream module (from cradle-to-gate):** Harvesting of cotton, extraction man-made fibres, processing into warp and weft yarns, extraction and production of the chemicals.
- Core module, manufacturing processes (from gate-to-gate): Transportation of raw materials to the core, manufacturing processes, impacts generated by fuel burned, impacts due to the electricity production and transport with in the production plant.
- Downstream module (from gate-to-customer): Transportation from factory gate to an average retailer/distribution platform. Use phase and end of life phase are excluded from the system boundary. Due to the aim of the EPD is to be used as B2B communication, apparel production (cutting, sewing), use phase (wearing, washing, drying) and end-of-life phases are not evaluated in this LCA study.

Geographical scope of the EPD	Worldwide
Functional Unit	1 square meter of denim fabric
EPD Type (System Boundary)	Cradle-to-Customer
Data Collection	Specific data (primary data) was used for the Core Module and gathered from the ISKO™ Manufacturing Plant. The manufacturing data are monitored and recorded in ISKO™ data collection system specifically per unit of product. Data represents the period from 1st June 2020 to 30th September 2020. For upstream module, selected generic data (secondary data) was applied and was obtained from Ecoinvent v3.6. For organic cotton LCA data GABI dataset for Cotton fiber (organic) (at gin gate) has been used. All databased are in line with ISO 14044 data quality requirements. LCA was modelled in SimaPro v9.1.
Allocation	No allocation conducted for input materials and energy consumption was collected specifically per functional unit.
Calculation Methods	All resource use values are calculated from Cumulative Energy Demand V1.11; net use of fresh water has been calculated from SimaPro Inventory result outputs. Potential environmental impacts are calculated with the CML-IA baseline V 3.06; ReCiPe 2016 Midpoint (H) v 1.04; Formation potential of tropospheric ozone (POCP) from LOTOS-EUROS as applied in ReCiPe Midpoint (H) v 1.13, 2008; IPCC 2013 GWP 100a V1.03 and USEtox 2 (recommended + interim) v.1.0 and Water Scarcity indicator from Pfister et al 2009 v1.02 methods in SimaPro software.
Cut-off Rules	Cut-off rule of 1% regarding waste and wastewater treatment was applied. Regarding to material and chemical inputs, no cut-off rule has been applied.

More information regarding to ISKO™ and its products is available on www.isko.com.tr.

## Resource Use for 1 sqm of 26623 REC Basic

RESOURCE USE							
P	arameter	Unit	Upstream	Core	Downstream	Total	
Primary Energy Resources Renewable	Use as energy carrier	MJ, net calorific value	1.02	1.41	0.002	2.44	
	Use as raw materials	MJ, net calorific value	0	0	0	0
