

Environmental Product Declaration

for **Eco 80's Rigid Jeans** trousers in accordance with ISO 14025

Programme:

The International EPD® System, www.environdec.com EPD Turkey, www.epdturkey.org

Programme Operator:

EPD International AB & EPD Turkey

Date Of Publication (issue): 2020-03-20

Date of Validty: 2025-02-16

An EPD should provide current information and may be updated if conditions change. The stated validity is therefore subject to the continued registration and publication at *www.environdec.com*

EPD Registration Number: S-P-01799

ENVIRONMENTAL PRODUCT DECLARATIONS

EPD for 90-100% cotton & 0-10% polyester jeans

PROGRAMME INFORMATION

Programme Operator

EPD International AB. Box 210 60. SE-100 31 Stockholm. Sweden E-mail: info@environdec.com

Regional Office: EPD Turkey, Nef 09 B Blok 7/15 Kağıthane/ Istanbul, Turkey www.epdturkey.org

Product Category Rules (PCR)

Trousers, shorts and slacks and similar garments 2019:06, version 1.01 UN CPC 282

PCR Review Was Conducted By

The Technical Committee of the International EPD® System. A full list of members available on www.environdec.com. Chair of the PCR review: Hüdai Kara Contact via: info@environdec.com

Verification

Independent verification of the declaration and data, according to ISO 14025:2006:

EPD process certification 📈 EPD verification

Third Party Verifier

Nikolay Minkov, Eng. MSc. LCA and Sustainability Specialist, Independent EPD Verifier Schwartzkopffstrasse 3, 10115, Berlin, Germany E-mail: niks.minkov@gmail.com Accredited or approved by: The International EPD® System

Data Follow Up

Procedure for follow-up of data during EPD validity involves third party verifier:

Owner of the Declaration: Martelli Manufacturer: Sanko Tekstil Isletmeleri San. ve Tic. A.S. Martelli Şubesi Organize Sanayi Bölgesi 3. Cadde No:13, İnegöl/Bursa, Turkey

Martelli has the sole ownership, liability and responsibility of this EPD. For further information about this EPD or its content, please contact Mr. Burak Can at bcan@martelli.com.tr

EPDs within the same product category but from different programmes may not be comparable.

MARTELLI WHERE COLLECTIONS BECOME REALITY

DISCOVER MARTELLI

Martelli is an exclusive denim production, washing and finishing facility. Creating limited-edition sample runs for ISKO and exclusive collections for deluxe labels.

With a facility over 25 000 square meters and a team of over 300 research and development specialists, Martelli Turkey is capable to cover 30 000 pieces of denim in their laundry per month.

HISTORY

As a denim laundry with more than 50 years of experience, Martelli is known for its creativity and innovation in denim finishing and garment dyeing. In 2004 Martelli Turkey was established by a joint-venture between Martelli Group and ISKO. Over the years Martelli Turkey and Martelli Italy have worked closed and shared their knowledge to renovate and challenge itself to add value to the products and denim and the fashion world. Martelli Turkey is now operating as an exclusive denim laboratory for ISKO.

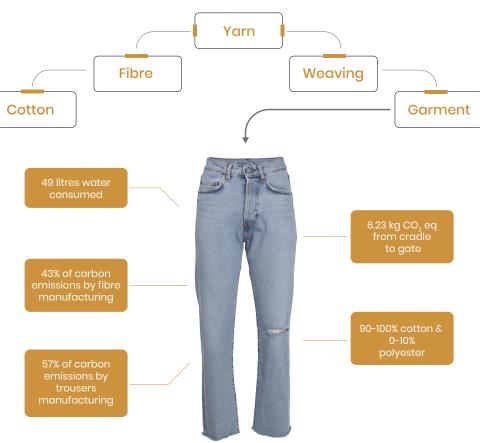

**BARE OF STREET *

PRODUCT INFORMATION

Eco 80's Rigid Jeans is a sustainable version of 80's Jeans processes where water consumption and electricity consumption can be reduced up to 40%. With this product group, the chemical bleaching methods have been eliminated. Low-temperature enzymes are used to get the stonewashed look.

Product Characteristics*	Test Method	Units
For woven materials: Abrasion Strength	EN ISO 12947-2	Over 20000 rubs
For woven materials: Tear Strength	ASTM D1424	Warp: 4558 kg Weft: 4900 kg
For woven materials: Tensile Strength	ASTM D5034	Warp: 43.91 kg Weft: 28.29 kg
Voluntary: For woven materials: Seam Slippage	ASTM D1683	7 kg (min)
pH of water extract	ISO 3071	7.2
Colour fastness to artificial light: Xenon arc fading lamp test	EN ISO 105 B02	6
Acid and Alkaline Perspiration	EN ISO 105 E04	4.5
Dry and Wet Rubbing	AATCC 8	Dry: 4.5 Wet: 3.0

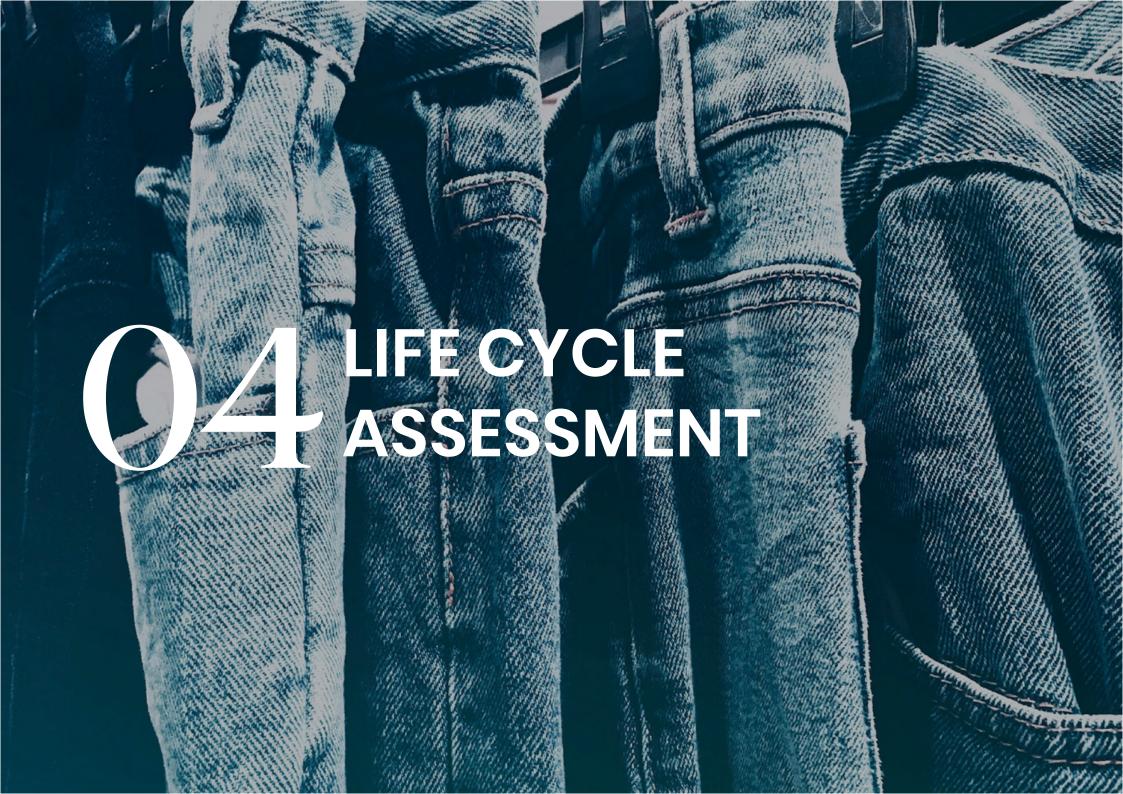

Materials in the Product	% in the product	Material Composition	Compliance with REACH
Fabric	92.4%	80-90% cotton 0-10% polyester	\checkmark
Paper Labels	0.79%	100% Paper	\checkmark
Metal Accessories	6.8%	100% Metal	\checkmark

Chemicals used in Martelli manufacturing comply with the Regulation (EC) No 1907/2006 of the European parliament and of the council of 18 December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH).

Packaging: PE packaging film is used to cover the end products. Classfied as Distribution Packaging: designed for the purposes of transport, handling and/or distribution.

*The functional unit does not take into account all technical, functional and aesthetic properties of the product. For comparability of products based on the same PCR, these aspects shall also be considered. Weave, Mass per unit area, Width are not disclosed due to

LIFE CYCLE ASSESSMENT

The International EPD® System has adopted an LCA calculations procedure, which is separated into three different life cycle stages: • Upstream module (from cradle-to-gate): Harvesting of cotton, extraction of man-made fibres, production of yarns and production of fabric, extraction and production of the chemicals.

• Core module, manufacturing processes (from gate-to-gate): Transportation of raw materials to the core, manufacturing processes, impacts generated by fuel burned, impacts due to the electricity production and transport with in the production plant.

• Downstream Processes (from gate-to-grave): Transportation from preparation to an average retailer. Use phase and end of life phase are excluded from the system boundary due to the aim of the EPD is to be used as B2B communication. The impacts of the downstream processes are negligible as being lower than 1% in the entire system boundary and not declared separately in the EPD.

Declared Unit

Geographical scope of the EPD

Worldwide

The declared unit is defined as 1 pair of trousers.

Cradle-to-customer

EPD Type (System Boundry)

Data Collection

Specific data (primary data) was used for the Core Module and gathered from the Martelli Manufacturing Plant. The only main material in the end product is fabric and LCA information has been provided by the fabric manufacturer and inserted into Simapro. Data represents the period from 1st January 2019 to 31th August 2019. For secondary data Ecoinvent v3.5 datasets were used. LCA was modelled in SimaPro v9.0.0.31.

Allocation

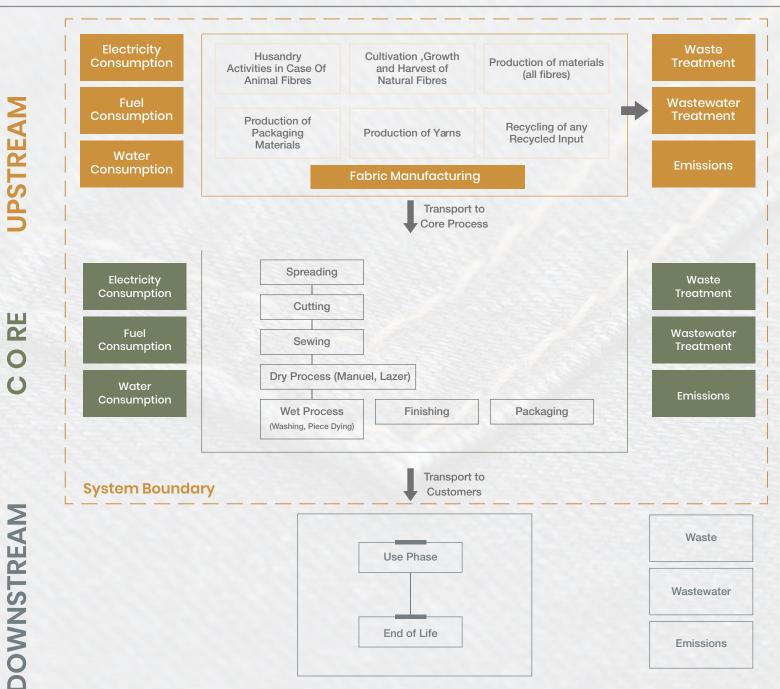

No allocation conducted for input materials and energy consumption was collected specifically per declared unit.

Cut-Off Rules

Waste and wastewater generated from core presses have been excluded due to the cut-off rule. Impacts caused by treatment operations have been calculated lower than 1% environmental relevance. Transportation to core processes was found negligible <1% for all categories.

Calculation Methods

All resource use values are calculated from Cumulative Energy Demand VI.11 in SimaPro outputs; net use of fresh water from SimaPro Inventory results. Potential environmental impacts are calculated with the CML-IA baseline V 3.05, Acidification potential from CML nonbaseline V 3.04, Formation potential of tropospheric ozone (POCP) from LOTOS-EUROS as applied in ReCiPe Midpoint (H) v 1.13 2008, methods in SimaPro software.
